

**Steve Schell**  
CTO & Chief Engineer, Heliogen Inc.

**Affordable, Always-Available Solar Energy Enabled by  
Thermal Storage**

**Biography**

Steve has 20 years of experience working with startups and venture capital backed companies and has forged a passion for bringing new technologies to market and leading diverse and talented teams. His work in product development, customer programs, IP generation, manufacturing engineering, product reliability and global supply chain translate well to Heliogen's roadmap. He has developed products ranging from utility-scale solar power generators to consumer goods, and has patents in solar thermal energy, robotics, and 3D printing. Steve holds a B.S. in Mechanical Engineering from Caltech.
